Develops user-centric web and mobile solutions by bridging interactive UI/UX design with responsive frontend engineering in cross-functional teams.

Frontend Development | UI/UX & Product Design | Responsive Web Design | Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Frontend Engineer – Intern, 99 Group 02/2025 – 02/2026

- Engineered cross-device responsive web interfaces and a dynamic property review module integrated with a Strapi headless CMS using React, Next.js, and TypeScript.
- Developed the New Search Result Page (NSRP), advanced filtering logic, and Nearby Point of Interest (POI) components to streamline user property discovery and navigation.
- Optimized frontend architecture and page metadata to align with Search Engine Optimization (SEO) best practices, improving crawlability and web performance across property listings.

Network Engineer (Contract), PT. Info Solusindo Data Utama 01/2022 – 03/2022

- Creating network solutions for network architecture and topology
- Installation and Integration of Fortinet Firewall to 10 bank branch offices throughout Jabodetabek and Banten
- Province
- Conduct a location survey to determine what solutions should be done

ACADEMIC PROJECTS

Resumeez (ATS CV Builder & Parser): Constructed a web application for generating and evaluating ATS-friendly resumes using rule-based parsing logic. Designed the end-to-end user flow, wireframes, and interactive UI components to provide automated resume scoring feedback. Tools: Figma, React, Next.js, TypeScript, Tailwind CSS.

Recipeez (Mobile Recipe Discovery App): Formulated an Android application featuring global recipe search, nutritional data breakdown, and meal filtering by integrating third-party REST APIs. Designed the mobile UI prior to implementing the client-side architecture. Tools: Java, Android Studio, Spoonacular API, Figma.

RAiso (Stationery E-Commerce App): Designed and developed an Android e-commerce application for stationery products, covering product catalog browsing, cart management, and checkout flows. Translated high-fidelity interactive prototypes into functional mobile views. Tools: Java, Android Studio, Axure RP.

Kompas News Website Redesign: Led UI design and UX research in a collaborative team to overhaul the Kompas news portal interface. Conducted user interviews, identified navigation pain points, and built interactive prototypes to improve reading ergonomics and information hierarchy. Tools: Figma, Usability Testing, Wireframing.

EDUCATION

Bachelor of Computer Science, BINUS University (GPA: 3.60/4.00) 2022 – 2026

Relevant Courses: Software Engineering, Human and Computer Interaction, User Experience, Web Programming, Mobile Application Development, Data Structures & Algorithms.

TOOLS & TECHQNIUES: TypeScript; JavaScript; Java; HTML; CSS; React; Next.js; Vite; Tailwind CSS; Strapi (Headless CMS); Android Studio; Figma; Axure RP; Git; GitHub; RESTful API; Responsive Web Design; Wireframing; Interactive Prototyping; Usability Testing; User Acceptance Testing (UAT); Search Engine Optimization (SEO).
